ATLAS

atlasgraph.co.uk

AI agents that do the credit work on new trade accounts. Your credit team makes the call.

Nothing is approved or sent without a person on your team. Every figure shows its source.

WHAT ATLAS DOES

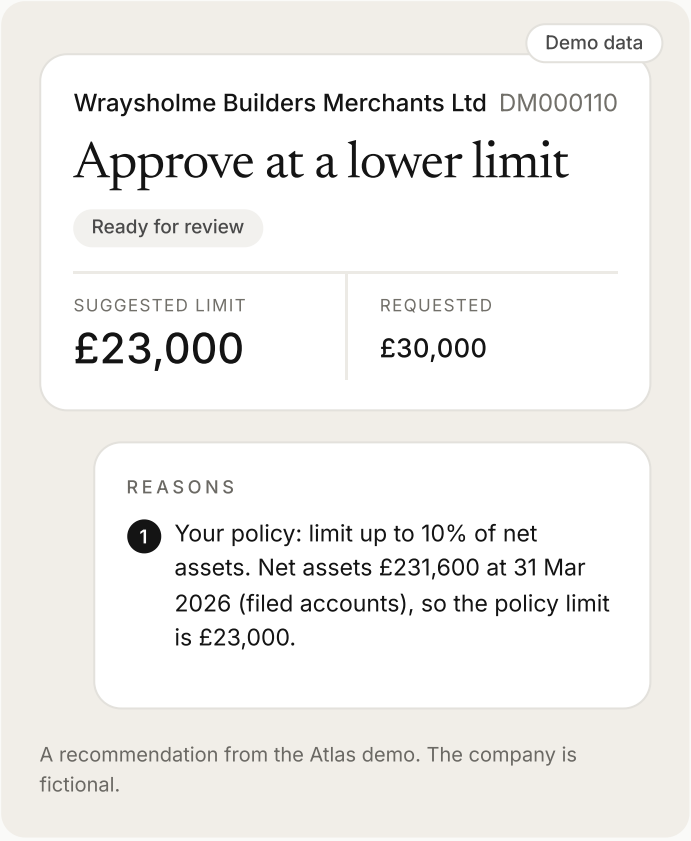

01 **Reads applications**
From a PDF, a photo or the email it came in, and lists anything missing.

02 **Checks companies and directors**
Status, filed accounts, charges and insolvency on the public register, and each director's other companies.

03 **Applies your credit policy**
Your rules set the outcome and the limit, with the figures behind it.

04 **Drafts the memo and the chasers**
A recommendation with reasons, and emails for anything missing, for your team to approve.

05 **Watches open accounts**
Checks the accounts you already trade with on a schedule and flags any change.

A recommendation from the Atlas demo. The company is fictional.

HOW TO START

01

A free sample memo

Send a UK company name and the limit they've asked for. You get Atlas's recommendation within a day. Public data only.

02

A 20-minute demo

One application, start to finish, on demo data or one of your own forms.

03

A 30-day trial

On your real applications, your team signing off every decision. Pilot letter, NDA and data processing agreement agreed first.

04

Carry on monthly

If it's saving your team time. If it isn't, stop.

You can stop after any step. We'll talk about price when we speak.

Send one company name for a free sample memo.
